Music Intro:N/A

Episode # 6 for August 6, 2007

Show Title: Protect your computer from harm.

Notes: We talked a little bit about what's on the back of your computer, what are all these colors and what do I plug into them.

- Ps/2 Purple connector for Keyboard
- Ps/2 Green connector for mouse
 - Both of these can also be USB connectors now
- VGA cable is blue – Monitor
- Serial Cable is possibly green – Used for old scanners, and webcams
- USB – 2.0 on newer computer, but on old computer is USB 1.1 (slower)
- Printer LPT – Printer, and some scanners
- Microphone – pink
- Speakers – lime green
- Input – blue

Speaking on Protection of your OS

- Windows Defender - <http://www.microsoft.com/athome/security/spyware/software/default.msp>
- Spybot Search & Destroy - <http://www.safer-networking.org/en/index.html>
- Adaware - http://www.lavasoftusa.com/products/ad_aware_free.php?PHPSESSID=18eec804148ed68098c1802153010437

Discussed Power supplies

Battery backups are critical to your computer systems, the proper power strip or backup battery can help the longevity of your computer. It can protect your computer from the various issues people have with home grade power. I have named 3 companies below to check out:

- APC – <http://www.apc.com/products/category.cfm?id=13&segmentID=1>
- Belkin - http://catalog.belkin.com/IWCatSectionView.process?Section_Id=76
